EXAMINER'S AMENDMENT

The Examiner suggested amendments to claim 1 to define over the closest prior art. The Examiner suggested that the limitations of claim 2, as well as defining that the transverse bars have a rectangular transverse cross-section, if put into claim 1 would define over the closest prior art and would be allowable.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Keith Kline on 27 January 2005.

The application has been amended as follows:

In the Specification

On page 3 of the specification, after line 5, insert ---

BRIEF DESCRIPTION OF THE DRAWINGS

Fig. 1 is a front view of the sweeping and wringing apparatus of the present invention.

Fig. 2 is a side view of the sweeping and wringing apparatus of the present invention.

Fig. 3 is a side view of one of the transverse bars of the present invention.

Fig. 4 is a cross-sectional view of one of the transverse bars of the present invention.

Fig. 5 is a front view of the squeezing head of the present invention.

Fig. 6 is a side view of the squeezing head of the present invention.

Fig. 7 is a side view of one of the squeezers of the present invention.

Fig. 8 is a cross-sectional view of one of the squeezers of the present invention.

Fig. 9 is a side view of the sweeping and wringing apparatus of the present invention in the second embodiment.

Fig. 10 is a side view of one of the squeezers of the present invention in the second embodiment.

Fig. 11 is a cross-sectional view of one of the squeezers of the present invention in the second embodiment.

Fig. 12 (prior art) is a front view of a conventional sweeping and wringing apparatus.

Fig. 13 (prior art) is a side view of a conventional sweeping and wringing apparatus.---

On page 6 of the specification, delete page 6 in its entirety.

In the Claims

In claim 1, line 13, after "distance" insert ---, each of said transverse bars has a plurality of engaging sections, each with a rectangular transverse cross-section, and a plurality of gliding sections, with each of said gliding sections placed between two engaging sections, and wherein each of said squeezing sections has a longitudinal canal with a rectangular transverse cross-section which is put over one of said engaging sections---,
line 15, change "excentrically" to ---eccentrically---.

Cancel claim 2.

In claim 3, line 2, after "oval" insert ---transverse--- and change "excentrically" to ---eccentrically---.

In claim 4, line 2, after "circular" insert ---transverse--- and change "excentrically" to ---eccentrically---.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: The claimed sweeping and wringing apparatus defines a unique wringer mop combination not taught by the prior art. In particular, one where squeezers or rollers are eccentrically mounted on transverse bars, wherein the squeezers each have a plurality of aligned squeezing sections and each have a canal with a rectangular transverse cross-section which is put over spaced engaging sections of the transverse bar that also have a rectangular transverse cross-section. While Libman may disclose a rectangular canal in the non-eccentrically mounted rollers (30) which receive the bars (32), there is no suggestion of the transverse bars also having a rectangular transverse cross section. Thus, there appears no reasonable rejection to be made using Hoffman, Lin and Libman that would meet claim 1 as amended.

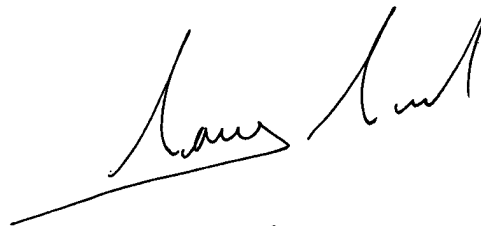

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
